

Demonstration Pilot / Chief Pilot & Operations Manager (CAR 703 AOC)

Base: Greater Toronto Area | Thunder Bay, ON | Collingwood, ON
(Final base flexible based on candidate)

Levaero Aviation is the exclusive Canadian Authorized Sales & Service Centre for Pilatus Aircraft and a recognized national leader in Pilatus PC-12 and PC-24 aircraft sales, service, and support.

We are seeking an experienced, highly professional aviator to join our organization as a Demonstration Pilot who will also serve as Chief Pilot / Operations Manager and DFO, responsible for maintaining Levaero's CAR 703 Air Operator Certificate in good standing.

This is not a traditional charter role. It is a leadership position that combines regulatory oversight, aircraft demonstration flying, post-maintenance operational flying, and direct collaboration with sales and marketing in representing both Pilatus and Levaero Aviation across Canada and internationally.

This role sits at the intersection of operational leadership, technical expertise, and customer engagement.

You will

- Lead and oversee Levaero's 703 flight operation
- Serve as primary demonstration pilot for the Pilatus PC-12
- Conduct post-maintenance and operational check flights in support of our maintenance organization
- Work closely with sales and marketing as a product expert
- Engage directly with aircraft owners, corporate flight departments, and industry leaders
- Support the long-term transition into Pilatus PC-24 demonstration flying

Annual flight time is typically 100–200 hours, including:

- Customer demonstration flights
- Aircraft delivery and concierge flying
- Post-maintenance and operational check flights
- Participation in national and international industry events (CBAA, NBAA, demo tours)
- Mentor/support flying and operational training support

Demonstration Pilot / Chief Pilot & Operations Manager (CAR 703 AOC)

Travel is typically predictable and scheduled in advance, concentrated around demonstration tours, industry events, aircraft deliveries, and major maintenance events. This is not an on-call charter lifestyle. Administrative duties may be performed partially remotely when operationally feasible.

Fleet & Equipment

The successful candidate must be comfortable operating across differing PC-12 models and avionics configurations.

Levaero will support FAA licence conversion as required.

A future Pilatus PC-24 type rating may be provided for the right candidate.

Key Responsibilities

Demonstration & Sales Support

- Perform aircraft demonstration flights for prospective customers and their representatives
- Deliver structured aircraft briefings and mission capability discussions
- Provide technical product expertise throughout the aircraft sales process
- Support sales and marketing initiatives with operational insight
- Represent Levaero and Pilatus at trade shows and demonstration tours
- Support aircraft delivery flights and customer transition flying

Operational & Post-Maintenance Flying

- Conduct post-maintenance and return-to-service check flights under the AMO and AOC as applicable, in accordance with approved procedures
- Coordinate closely with maintenance leadership on complex inspection events, avionics upgrades, and major maintenance returns
- Maintain high technical familiarity with aircraft systems and avionics configurations
- Uphold operational discipline and flight standards consistent with Levaero's safety culture

Chief Pilot / Operations Manager (703 AOC)

- Maintain regulatory compliance under Canadian Aviation Regulations (CAR 703)
- Ensure the AOC remains in good standing
- Oversee operational standards, SOPs, training programs, and pilot standardization
- Act as DFO in accordance with CAR requirements
- Provide mentorship and leadership within a small, professional operation
- Coordinate with Transport Canada and internal stakeholders on operational matters

Demonstration Pilot / Chief Pilot & Operations Manager (CAR 703 AOC)

Minimum Qualifications

- Valid Transport Canada Commercial Pilot Licence (CPL) with Group 1 IFR
- Valid Category 1 Medical
- Minimum 2,000 hours on Pilatus PC-12 (substantial operational depth required)
- Strong working knowledge of Canadian Aviation Regulations, particularly CAR 703
- Legal eligibility to live and work in Canada and travel internationally
- Advanced avionics proficiency and adaptability across aircraft configurations
- Professional presentation and strong customer-facing communication skills
- High degree of organization and operational discipline
- Proficiency with Microsoft Office

Preferred Qualifications

- Previous Chief Pilot, Operations Manager, Training Captain, or Standards experience
- Experience in aircraft demonstration, corporate, or customer-facing flying roles
- Experience conducting post-maintenance or check flights
- FAA licence or ability to obtain FAA conversion (assistance provided)
- Jet experience and/or interest in future PC-24 qualification

Compensation & Benefits

Levaero offers a competitive executive-level compensation package commensurate with experience and qualifications, including:

- Base salary range of \$145,000 – \$160,000 CAD, depending on experience and qualifications
- Performance bonus based on the individual's measurable contribution to aircraft sales and overall sales support activities
- Pension program
- Comprehensive medical and dental benefits
- Professional development and training opportunities
- FAA conversion support
- Potential PC-24 type rating sponsorship

Why Join Levaero Aviation

Levaero Aviation is a growing, industry-leading organization representing one of the most respected aircraft manufacturers in the world.

Demonstration Pilot / Chief Pilot & Operations Manager (CAR 703 AOC)

This role offers:

- High autonomy
- High visibility within the organization and industry
- Direct operational impact
- Meaningful engagement with aircraft owners and corporate flight departments
- A professional environment built around safety, credibility, and brand reputation

This is a leadership position for an experienced PC-12 pilot who wants to operate at a higher level — operationally, professionally, and strategically.
