Market Analyst

MISSISSAUGA, ON

Levaero Aviation is a Canadian leader in business aviation - the exclusive Canadian authorized sales and service centre for the Pilatus PC-12 and PC-24, and a trusted name in aircraft sales, brokerage, and maintenance for nearly 30 years.

We're growing, and we're looking for a sharp, curious, and detail-driven individual to join our team as a Market Analyst. This is a ground-floor opportunity to build a career at the intersection of aviation and business intelligence.

What You'll Do:

- Track and analyze the business aviation market - aircraft valuations, inventory movements, transaction trends, and competitive activity
- Build and maintain databases of aircraft listings, specifications, and ownership data
- Produce market research reports and briefings to support our sales and leadership teams
- Monitor industry publications, fleet data, and transaction activity to surface insights
- Support aircraft acquisition and sales transactions with timely, accurate research

What We're Looking For:

- A passion for aviation (knowledge of business/general aviation is a plus)
- Strong analytical and research skills - you love digging into data
- Excellent communication, including written; you can turn complex data into clear summaries
- Proficiency with spreadsheets and presentation software; experience with aviation databases (AMSTAT, JETNET, or similar) is an asset
- A self-starter attitude with strong attention to detail
- A degree is great, but frankly, it's not what we're hiring for - we want someone who can find information, make sense of it, and communicate it clearly. If that's you, we want to hear from you regardless of what your resume says.

Join the team that's elevating Canadian aviation.

Market Analyst

MISSISSAUGA, ON

Why Levaero?:

We're a tight-knit, high-performing team that takes aviation seriously - and has fun doing it. You'll learn from industry veterans, work with world-class aircraft, and have direct visibility into the full lifecycle of business aviation deals. This isn't a back-office role - your research will directly shape how we go to market. This is an opportunity to build a foundation in business aviation that will benefit you throughout your career.

How to Apply - and this part matters:

Don't just send us your resume. Send us something you've researched or analyzed - it can be anything. A breakdown of aviation trends you've noticed. A summary of something happening in Canadian business aviation. A data set you built on your own curiosity. A market you dug into for fun.

It doesn't have to be aviation-related. It just has to show us how you think.

Send your research sample along with a resume and note on why this role interests you to: jointheteam@levaero.com

Applications without a research sample will not be reviewed.

Join the team that's elevating Canadian aviation.
